1978 Silver Anniversary Corvette

I have owned the car for around 5 years and have rebuilt or repaired most things that go wrong. This is straight clean reliable Vet that doesn't rattle and run down the road like a truck as many do. It is showing 80K on the clock and the way it drives I believe it to be original. The motor has been rebuilt, new bilstein shocks all round, new mono fibreglass spring to rear, carpets, interior etc etc, all in very good condition. 3 speed auto working perfectly. Heater and all lights etc work, electric windows, aerial, most things work except AC and clock. (As normal) I have glass and solid 'T' tops, CD player installed with custom made speakers. This car must be viewed and driven to be appreciated.

Asking \$32500 ONO
