1957 Nash Metropolitan - SOLD!

Ok - here is the low down to kill any rumours or speculation!

Yes, we "sold" this Nash to "Elvis" at Beach Hop 05 for \$11,200. Part of the deal was that we got it registered and a WOF. We've finally got it just about ready for WOF etc, so it is back on the market. Hey - we are just volunteers and do this in our spare time!

The car has been re-wired, new tail lights and has been put back to stock height. The motor has had a tune up and the brakes are new. New clutch master cylinder as well.

The car has a couple of small bubbles appearing - nothing major. However there is a small piece of rust on the inner sill that would need attention for Vinning - should only be a couple of hundred bucks to repair.

Paint is gold metalflake with new white interior and black carpet. Fake Leopard skin on the dash and hood lining.

Engine is stock - a power house 1500cc Austin motor and 3 speed manual.

These little cars are very sought after in the USA....
